

## **A VISUALLY EFFECTIVE LECTURE @ KKN**

Mr. Ram Prasad, an alumnus KKN 1988 Batch, revisited the campus on 16 November 2017 with his classmates Mrs. Vaidehi, Mr. Anantha Krishnan and his father. He narrated his experiences working with Disney, Pixar as an Animator. He is currently the owner of a startup for flood and tsunami mitigation. He showed the students some clips from the movies he had worked on like Iron Man, Avengers and explained as to how concepts like calculus & Physics had numerous real life applications. He motivated the students by telling them that he himself had been an average scoring student in his school days but when he found his passion, he worked towards it and got into BITS Pilani. What they learn in school may not look significant but later it would help them in their desired fields of study/career. In the questioning session that followed, he answered questions like, 'How to start Graphic designing?' and other technical questions while assuring the students that if they can truly find their passion and fire, they can truly reach great heights. It was an INTERACTIVE and INFORMATIVE session.
