

A K Samban Award – 2018

“The Science of today is the Technology of tomorrow” – Edward Teller

The A K Samban Award for Creativity in Science is given annually in honour of Mr. A. K. Samban, our former principal and chemistry teacher of PSBB Ngm, whose ability to make the subject interesting and engross students was legendary. Celebrating him and the world of science, the A K Samban award acts as a platform for students to showcase their scientific temper and innovate and ideate to solve problems and explore science in their own way.

The competition was held on the 5th of December 2018 at PSBB Nungambakkam. The enthusiastic participants were judged by two eminent people – Mrs. Suchitra, Sr. Vice Principal and a popular Physics teacher of Chennai Public School, Thirumazhisai and Mrs. Srividya Ramasundaram, a retired chemistry faculty of PSBB Nungambakkam with over three decades of teaching experience.

With over 20 participants from the various grades, a plethora of ideas ranging from a UV Food Preserver to an efficient way of powering electric cards were presented. Students came up with brilliant working models and pioneering ideas for a better understanding of our surroundings and solutions for a better tomorrow.

Regardless of which team emerged victorious, the true winner was indeed science, as through the presentations, one could see the future of science and technology unfold. Truly, the event was thought provoking, enjoyable and a grand success.
