

Carve Your Career

On the 21st of July, Std XII students of the Commerce stream were given a unique opportunity to attend a Career Counselling Session by Malavika Kannan, a vibrant young alumna (batch 2019-2020).

The session began with a question and answer session in which a few common queries were put forth. This was followed by the specific detailing of options present for commerce students both in India and overseas. Apart from the common choices like accounting and finance, lesser known career choices like theology and social work were elaborated. Along with every career option, the top colleges available in India were listed. The session ended with an in-depth analysis of lucrative careers to choose from.

The entire session gave the Commerce students a deeper understanding on how to choose a University and specialisation while also keeping in mind the future career opportunities. The thought provoking and informative session was much appreciated.
